

Entertain & Inspire to Educate

Science, Mathematics, Technology, History, Health & Safety, Drama, Environment, PSHE, and Citizenship.

Shows & Workshops Key Stage 1 - 4

Creative Workshops

"I learnt loads but it was easy to follow and entertaining."
"One of the best things we have done at Summer School!"
"It was weird and wonderful and the man was very funny."

Circus Science

"A unique way of delivering science"

Maths Magic

"We have used many of the scientific concepts illustrated in the show to support our Science lessons."

Eco-show

"You managed to keep the attention of over 100 children for over an hour and got them talking about science in the playground afterwards."
"Your workshops were an inspirational combination of theory and practice, mathematics and science"

INSPIRATIONAL SCIENCE THEATRE COMPANY

"I really didn't know that was science sir!"

INSPIRATIONAL SCIENCE THEATRE COMPANY

Educational Shows

Entertaining Science

Key stage 2/3

Jugglers love gravity, unicyclists keep moving to stay still, intelligent yo-yo's and much more...

Circus Skills, historical drama and audience participation introduce the

audience to **forces of gravity, air resistance, friction, equilibrium and gyroscopes.**

'Mathamagic'

Key stage 1

Simple maths and complex magic, designed to entertain and educate without your brain disappearing.

Counting, recognising patterns, shapes and avoiding confusion.

'The Line Up'

Key stage 3/4

Cabaret Singer Johnny Fabulous is murdered during a TV audition, but who could possibly have killed this up and coming star. His ex-girlfriend ? His

agent?

Drama, literacy, maths and science skills.

'How to Save the Planet in 45 minutes'

Key stage 1-4

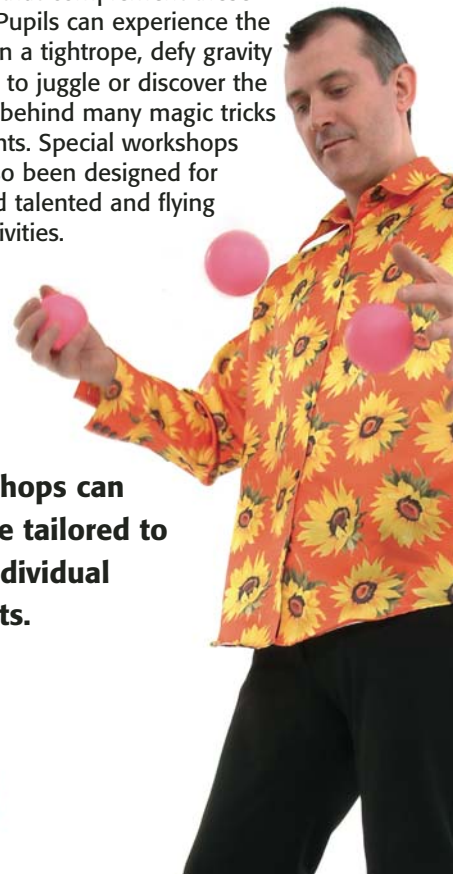

Join Dr Ken on his one wheel energy saving vehicle in his bid to save money and mankind. Lasting up to an hour this show looks at **carbon reduction, saving water, preserving resources, recycling, creative green transport and sustainability.**

Workshops

Key stage 2-4

A number of workshops are available for schools that complement these shows. Pupils can experience the forces on a tightrope, defy gravity learning to juggle or discover the science behind many magic tricks and stunts. Special workshops have also been designed for able and talented and flying start activities.

Workshops can also be tailored to suit individual projects.

Background

Dr Ken completed a PhD in soap bubbles before running away to join the circus. Juggling has taken him several times around the world whilst his science training led him to the world of radio and television, producing and sometimes presenting educational programmes. A national lottery grant enabled his science background and unique performing talents to be combined. He recently went back to school and gained Qualified Teacher Status in science and drama.

Dr Ken can be found performing all over the world but recently he has found time to explore how circus skills effects learning and behaviour, produced science films with pupils and investigated the use of drama in science.
